CGPA :7.71 Jalandhar City, Punjab

Senior Secondary Education, *New St. Soldier Sen Sec Public School* 2019 – 2021
Percentage: 77 Jalandhar City, Punjab

Academic Education, *The Gurukul School* 2019
Percentage: 73 Jalandhar City, Punjab

Training & Experience

Webkul, *Software Engineer (6 months)* 08/2025 – 02/2026
PHP Developer Noida, Uttar Pradesh
Worked in a product-based IT company developing and customizing WordPress themes and plugins. Built and integrated React-based components for e-commerce platforms, ensuring performance, scalability, and user-friendly interfaces.

Future Finders, *Full Stack Development* 06/2023 – 08/2023
Mohali,Punjab
Successfully completed a 45-day training program focused on full-stack development using HTML, CSS, JavaScript and React. Built responsive frontend interfaces and developed RESTful APIs for backend services.

Hoping minds, *Web Development* 01/2023 – 06/2023
Mohali, Punjab
Successfully completed a 6 Months training program focused on full-stack development using MongoDB, Express.js, React.js, and Node.js. Built responsive frontend interfaces and developed RESTful APIs for backend services.

Skills

Frontend Development
- Html
- Css
- Less
- JavaScript

Backend Development
- Node js
- Express js
- Php
- Laravel

Wordpress
- Themes
- Plugin
- Woocommerce

Database
- MongoDb
- Mysql

Projects

Hospital Management System
I developed a comprehensive full-stack hospital management website using the MERN stack (MongoDB, Express.js, React.js, and Node.js). The application includes secure user authentication, an appointment booking system, and a dedicated section for doctors' profiles. Additional features include a "Request a Callback" form, contact and about us pages, and a responsive layout for optimal user experience. The project emphasizes seamless frontend-backend integration and efficient data handling through APIs.

Blog Management System(Laravel)
Developed a full-stack Blog Management System using Laravel and MySQL with separate Admin and User panels. Implemented authentication, CRUD operations for posts and users, author-based post filtering, secure session handling, password hashing, and followed PSR-4 autoloading with OOP principles.

WordPress/WooCommerce Security Plugin – Cloudflare Turnstile Integration
Built a custom plugin using PHP and WordPress hooks to integrate Cloudflare Turnstile CAPTCHA into WooCommerce forms including login, register, checkout, order tracking, and payment pages. Ensured compatibility with both Gutenberg block-based and classic themes while maintaining performance and UX.
